

# Solutions by Garaventa

**Model:** GSL Artira  
**Project Name:** Mar-a-Lago Club East  
**Location:** Palm Beach, Florida  
**Installation Date:** 2002 (Rebuild 2005)

The original lifts were installed in 2002. Donald Trump's Mar-a-Lago Club provided access to the beach from the main resort via a tunnel under Route A1A. The resort decided to expand the accommodations by developing additional facilities on the beach side. Unfortunately, the lifts were damaged during the 2004 hurricane season. Garaventa upgraded the lifts in early January of 2005. The installation was completed in time for Mr. Trump's recent wedding and reception at the Mar-a-Lago Club ballroom.
