What is an Inclined Platform Lift?

An inclined platform lift easily transports a passenger in a wheelchair, or someone who has difficulty using stairs. The lift can be operated independently or by an attendant with an attendant remote control (optional item). Compatible for indoor and outdoor applications, the **Garaventa Inclined Platform Lift** is a versatile, attractive and cost-effective accessibility solution.

Why an X3?

No Building Renovations (Modifications)

Inclined platform lifts fit easily into most stairways and do not require specially constructed hoistways.

Preserve Heritage Buildings

Flexibility in design enables Garaventa's designers to adapt an inclined platform lift to virtually any building site with very little or no structural modifications. The availability of many colors and finishes ensures the lift will blend with its environment and preserve the look of a heritage building.

Save Valuable Floor Space

Floor space within a business building or a school is a valuable commodity. The X3 utilizes very little of this premium space.

Meets ADA Requirements

Garaventa inclined platform lifts are recognized in the ADA Accessibility Guidelines as a means to provide public building access when licensed for independent operation. They may also be used as an accessible means of egress when equipped with an auxiliary standby power system.

Design Assistance

With over 40 years of experience, Garaventa Lift is willing and able to overcome almost any design challenge you face. Please call our Design Hot Line with your accessibility challenge.

1-800-663-6556 or **1+604-594-0422**

How It Works

The platform of the X3 travels along two custom designed aluminum rails that can be mounted either directly to the wall or to support posts (towers). The upper rail houses a gear rack while the lower rail provides lateral support. The platform is propelled by means of a carriage mounted rack and pinion drive system.

Finishes

Standard Color

The X3 rails and loading ramps are made of Silver Moon painted extruded aluminum. The non-aluminum components of the lift are finished in a durable polyester powder paint coating that is electrostatically applied and baked at 210° C (410° F). Garaventa Lift standard color, Silver Moon, compliments a variety of modern and traditional decors (color samples are available upon request). The conveyance cover is made of black colored high quality ABS/PVC.

Optional Colors

Garaventa also offers a choice of colors from the internationally accepted RAL color charts (color samples are available upon request). Please note the conveyance cover is not painted. Custom paint finishes available, contact your local Garaventa Lift Representative.

Platforms

The platform is available in four standard sizes, with a rated load of 250 kg (550lbs.) evenly distributed around the center of the platform.

Platform Sizes:

- 800 X 1220 mm (31 1/2" X 48") **ADA**
- 800 X 1050 mm (31 1/2" X 41 3/8")
- 800 X 900 mm (31 1/2" X 35 1/2")
- 700 X 750 mm (27 1/2" X 29 1/2")

Platform Components

Platform Control Panel

The durable and vandal resistant platform control panel is mounted to the platform hanger. The standard platform controls consist of two large illuminated constant pressure **Directional Buttons** for independent operation and an **Emergency Stop Button** (with illumination optional).

Attendant Remote Control Unit

The platform can be equipped with an optional **Attendant Remote Control** that overrides the constant pressure **Directional Buttons** during attendant operation. The remote control unit can be removed when not required.

Standard Platform Features

Emergency Stop Button

Located on the platform control panel, this red button is used to stop the lift in an emergency.

Overspeed Safety

The over speed safety which is located in the upper carriage on the platform, consists of a mechanical pawl and electrical cutout switch. In the unlikely event that the lift should descend too quickly, both the mechanical and electrical safety will activate simultaneously and stop the platform from moving.

Leading Ramp Sensor

The leading ramp is sensitive to obstructions. The ramps are designed to be obstruction sensitive in the direction of travel on the outside of the ramps as well as from within the platform. The internal ramp sensor prevents a wheelchair from being off-center on the platform deck.

Under Platform Sensing Plate

The under platform sensing plate detects obstacles underneath the platform.

Platform Grab Bar

This safety feature increases the ease with which passengers may load and unload from the platform.

Emergency Fold

In an emergency the platform is able to be manually folded and will lock in the folded position.

Curved Safety Arms

Manual (residential) or fully automatic (commercial) curved safety arms further increase the safety of the X3 inclined platform lift.

Hour Counter

The hour counter enables the owner to determine the amount of time the X3 inclined platform lift has been used. This is a helpful tool in determining times for preventive maintenance.

Keyless Platform

Standard platform operation is keyless

Manual Emergency Lowering

Lift is equipped with manual hand wheel to allow the platform to be lowered in case of an emergency or power loss.

Optional Platform Features

Note: In some areas certain optional features are either not permitted or mandatory depending on local codes. Please consult your local Garaventa Lift representative for clarification.

Folding Seat Assembly

The folding seat is equipped with a safety belt.

Side Load

Designed for confined lower landing areas, this feature opens a side ramp simultaneously with the end ramp. This allows the passenger to wheel onto the platform diagonally offering easier access.

On Board Alarm With Illuminated E-Stop Button

The emergency stop button can be illuminated and activate an onboard alarm.

Keyed platform

This option is designed for protection against unauthorized usage of the lift.

Platform lock

This is an additional safety feature that locks the platform and protects the unit from vandalism. The lock is manual for a manual platform (residential) and solenoid powered for an automatic platform.

Attendant Remote Control

The Attendant Remote Control overrides the directional buttons during attendant operation. The remote control unit can be removed when not required.

Platform Power Fold and Unfold

Platform can be folded and unfolded from the call stations by pressing the appropriate button. This is standard operation for a commercial X3 inclined platform lift.

Guide Rails

Two aluminum extrusions make up the guide rail assembly. The upper rail houses the rack that the platform's pinion gear utilizes for travel. The platform is mechanically attached to this upper rail. The lower rail is used as a guide track for the rollers of the lower carriage assembly. The upper and lower rail heights are based on the stair angle and the platform size. For more information on rail heights see page 10.

Call Stations

Wireless (Mandatory for Commercial Installs)

Each landing is equipped with a call station. The call station enables the user to call and send the platform with a touch of a button. Platform fold and unfold is possible with the fully automatic model.

Keyless Call Stations (Adjustable In Field)

This feature allows the user to operate the lift without a key.

Mounting Options

The call stations are mounted directly on the wall. Optional flush mount call stations are available. The optional flush call station box dimensions;

Length: 185mm (7 1/4")

Width: 115mm (4 1/2")

Depth: 52mm (2")

Direct Mount	81	3 1/4	345	13 5/8	940	37	N/A	N/A	960	37 3/4
Towers	146	5 3/4	410	16 1/8	1005	39 1/2	N/A	N/A	1025	40 3/8

Attachment Methods

The extruded aluminum guide and support rails can be directly mounted to the wall or attached to steel support towers. There are various attachment methods used to support the X3.

**Direct Mount to 50x200
(2"x8") and 50x100
(2"x4") Boards on Wood
Stud or Thin Block Wall**

Direct Mount Anchored to Solid Walls

- Solid concrete (152mm (6") thick minimum)
- Concrete block (203mm (8") minimum without reinforcement or 152mm (6") minimum with reinforcement)
- Wood support posts located in wall (4" x 6" min.) Locations determined by Garaventa Lift.
- Steel support posts located in the wall. 76mm x 76mm x 6mm wall / (3" x 3" x 1/4") minimum. Locations determined by Garaventa Lift.

Direct Mount Anchored to Wood Stud or Thin Block Walls

The upper rail must be attached to a 2" x 8" board that is secured to the wall. For the lower rail, a 2" x 4" board can be used. Each board must be fastened into every available wall stud with minimum two screw fasteners.

Note: Not Suitable for Steel Stud Applications.

Attachment Methods (Continued)

**Thin Structural Wall
(Through-Bolting
may be applied)**

Freestanding Support Towers

Required where no support walls exist, or when the lift must be located away from a wall structure.

- Solid concrete stairs/landings
- Wood stairs/landings over 76.2mm (3") thick
- Concrete steel pan treads (towers must be secured back to the stringer with brackets for extra support)

Open Balustrade (Towers in the core)

In situations where the stairs cannot support free-standing towers and where direct mounting is not feasible, it may be possible to install support towers in the open core. This may also be a solution where there is insufficient clearance with towers on the treads. The towers are fastened to the floor and secured to walls or stringers.

Overhead Clearances

Overhead Clearances Required For Folded Platform

Overhead Clearances to meet US Code Requirements (ASME A18.1b)

Refer to page 12.

Overhead Clearances to meet Canadian Code Requirements (CSA B355-2000)

X3 Loading Diagram

Based on 800x1220 (31 1/2" x 48") platform

F1= 129 kg =>1265 N

F2= 250 kg (550 lb) (max. loading capacity) => 2452 N

d1= 360mm (14 1/8")

d2= 565mm (22 1/4")

x= 81.75mm (3 1/4")

F = F1+F2 = 1179 + 2452 = F = 3717 N

Moment over F1 & F2:

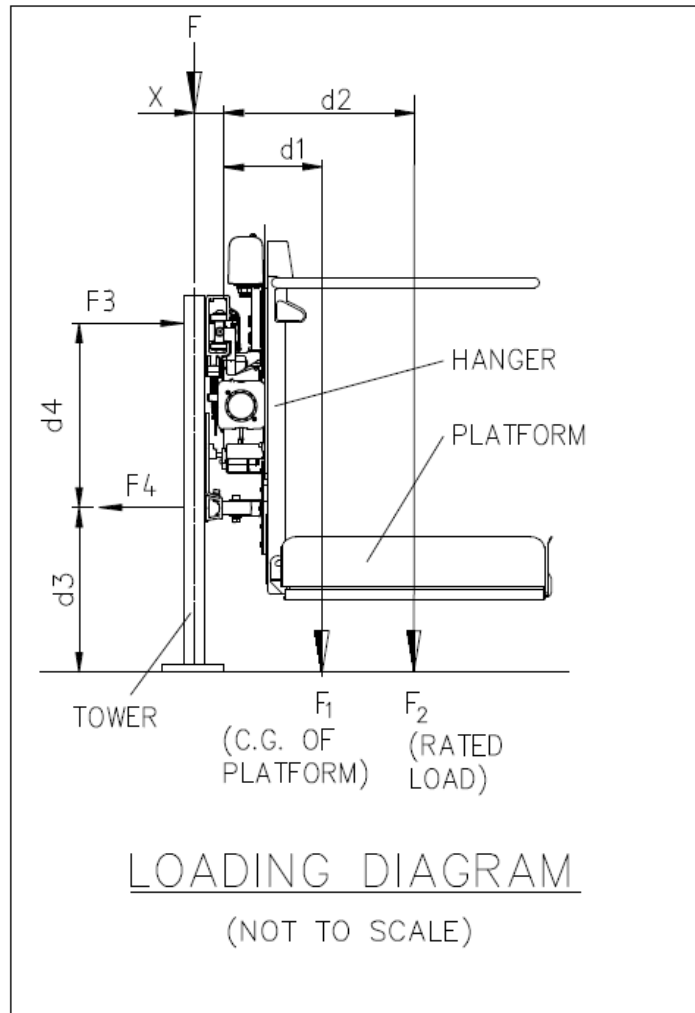

$M = F1 * (d1+x) + F2 * (d2+x) => M = 2251 Nm$

Pulling Force F3:

$F3 = M / (d3+d4) => F3 = 2810 N$

Pushing Force F4:

$F4 = M / d4 => F4 = 3752 N$

X3 Technical Reference

Application

Straight stairways

Platform Sizes

800 x 1220mm (31 1/2" x 48") - ADA Compliant
800 x 1050mm (31 1/2" x 41 3/8")
800 x 900mm (31 1/2" x 35 3/8")
700 x 750mm (27 1/2" x 29 1/2")

Rated Load

250 kg. (550 lbs.)

Speed

4 meters (13 ft) per minute

Operating Controls

Call Stations: Wireless, keyed (STD) call stations with encoded communication to stair lift. Powered by a regular 9 Volt battery. Call station are mandatory for commercial installations.

Platform Controls: Keyless (STD) with constant pressure switches, 24 VDC, equipped with emergency stop switch.

Drive System

Motor: 24 Volt PMDC Motor with 374 W and IP 54 protection

Power Requirements: 2 x 12 VDC, 7.2Ah Batteries (residential) 18.0Ah (public package) in a housing located behind the conveyance

Charger: 120 VAC, 50Hz, single phase providing 2 amp charging current to unit.

Power Transmission: Rack & Pinion

Emergency Use: Handwheel is provided

Rail System

Extruded aluminum painted Silver Moon with integrally mounted zinc plated gear rack.

Overspeed Safety

Mechanical overspeed sensor and brake, with electrical drive cut-out protection.

Curved Safety Arms

Fully automatic, 32mm (1 1/4") diameter safety arms, top of arm 948mm (37 3/8") above platform deck.

Pedestrian Safety Lights

Illuminated tube lighting, located at both ends of the platform deck. Alerts pedestrians that the platform is in motion.
